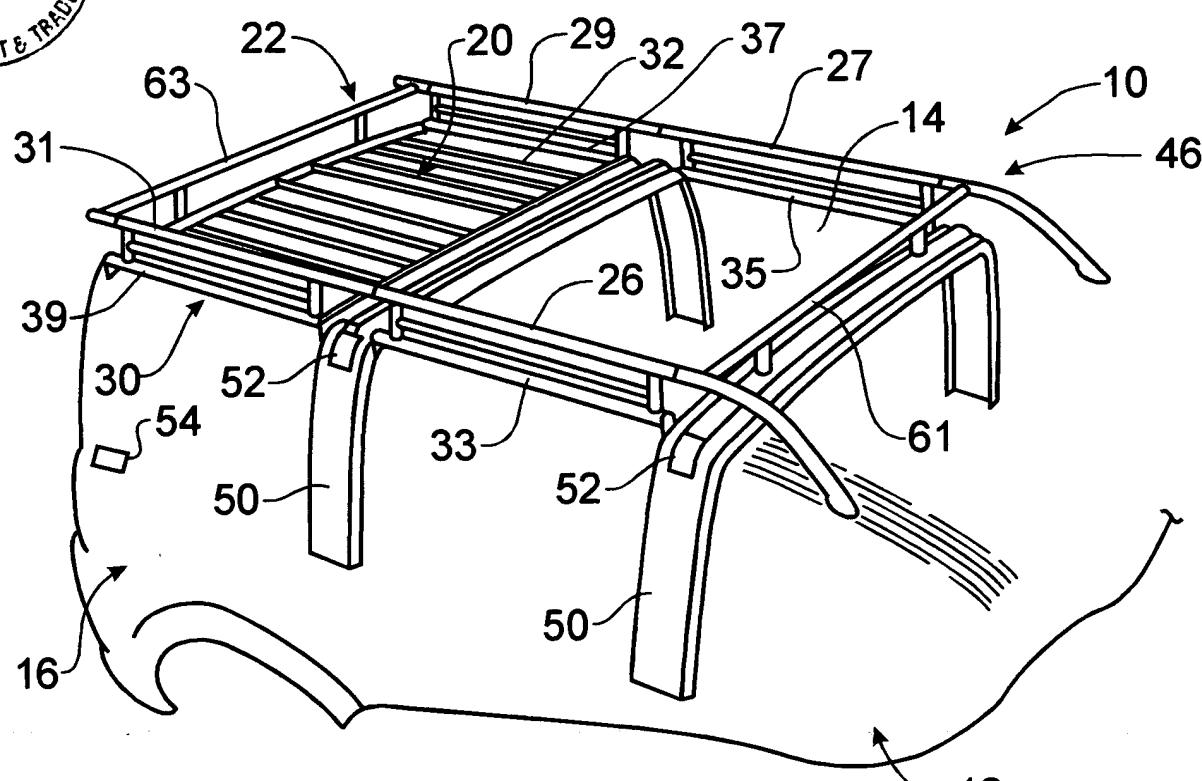

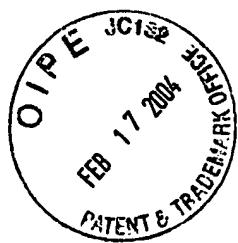

Fig. 1

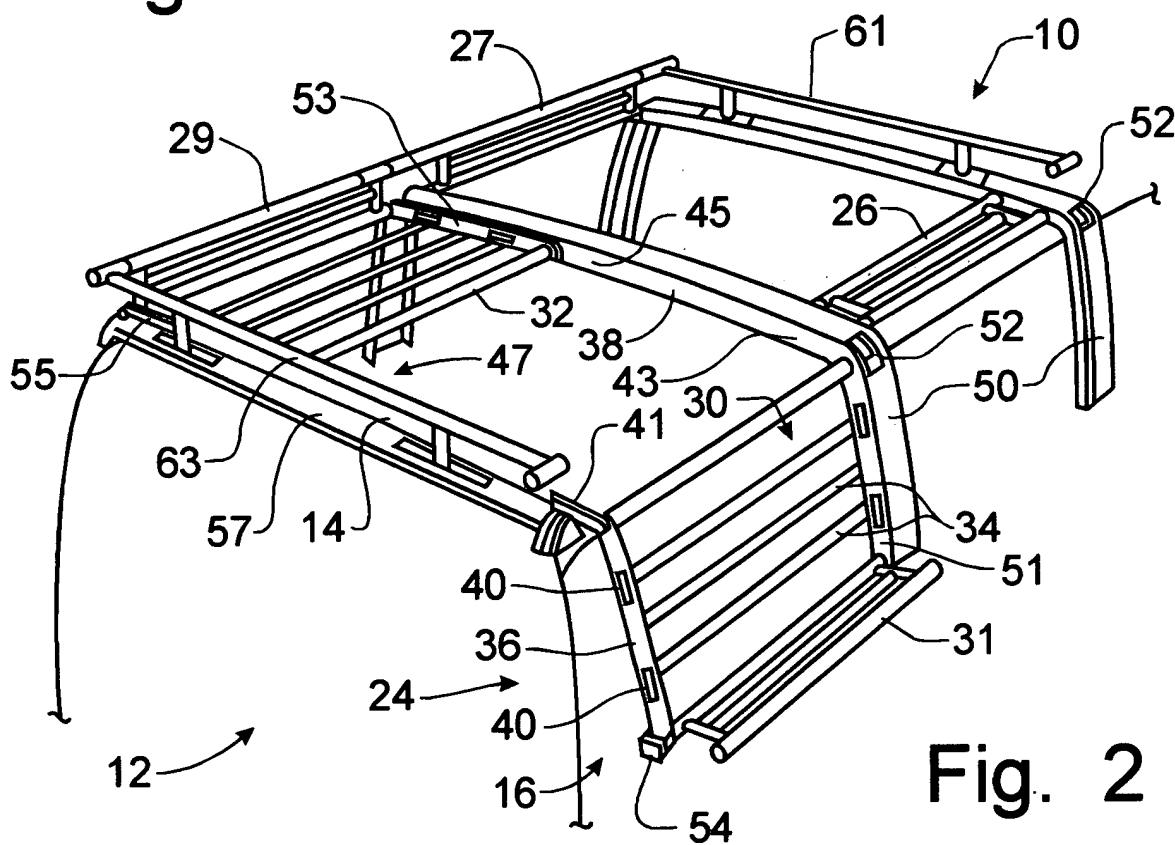

Fig. 2

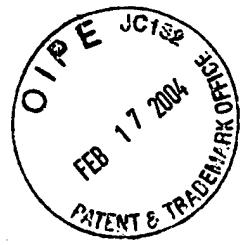

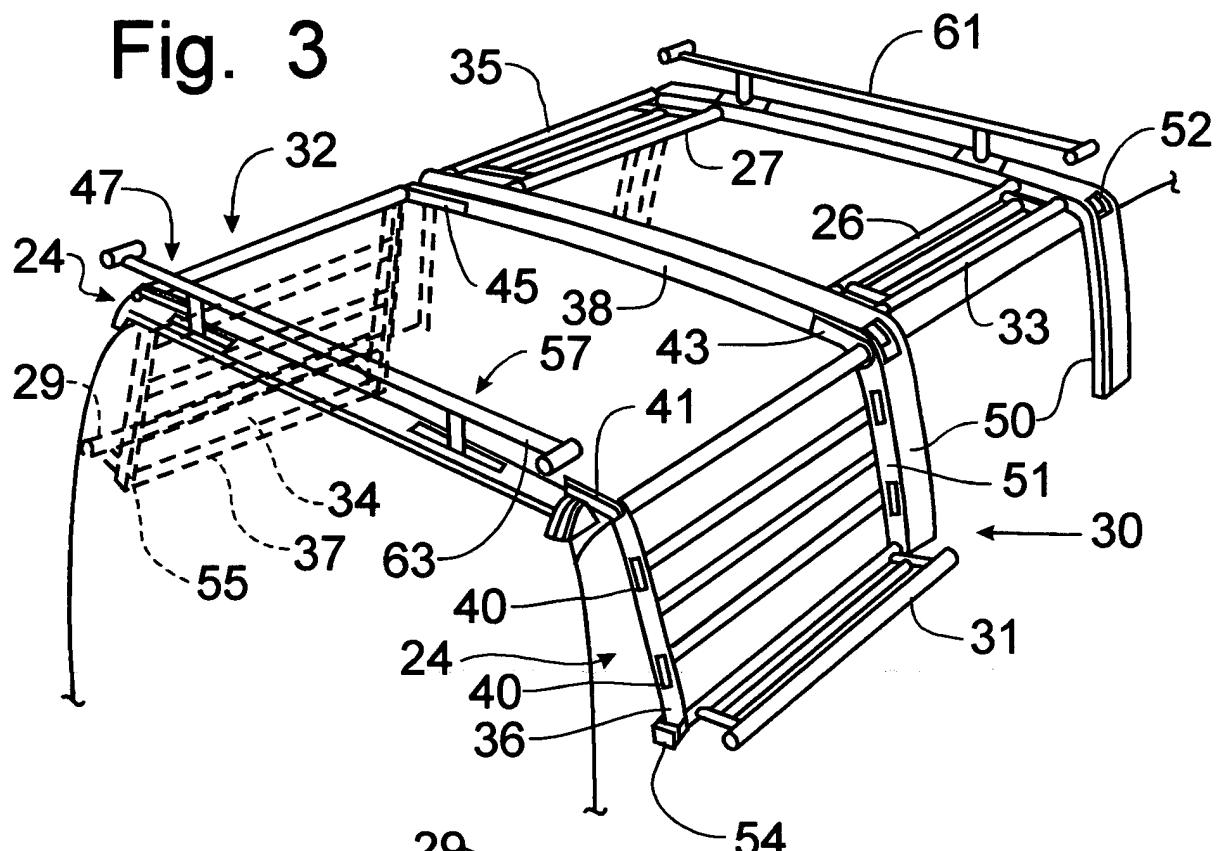

Fig. 3

The diagram illustrates a roof rack system for a vehicle. The main components include a top crossbar assembly (29, 31, 63) mounted on the roof rails (37, 35), a side rail assembly (61) attached to the body (54), and a front crossbar (33). The system is secured to the vehicle's body using brackets (52, 50) and fasteners (39). A curved bracket (16) is also shown at the front. The entire assembly is designed to support luggage or cargo.
